The screenshot shows the Karger website homepage. At the top left is the Karger logo. To its right is a search bar with the text "Search..." and a dropdown menu labeled "All Content" with a magnifying glass icon. Further right are links for "Advanced Search", "Register", "Karger Publishers internal", and "Login". Below the search bar is a horizontal navigation bar with five items: "WHO WE SERVE", "WHAT WE OFFER", "WHAT WE SOLVE", "PUBLISH WITH US", and "RESOURCES FOR YOU". A red box labeled "主要导航" (Main Navigation) points to this bar. Below the navigation bar is a large hero image of a man's face. Five callout boxes are overlaid on the image: 1. A yellow box pointing to "WHO WE SERVE" with the text "为所有利益相关者 (作者、图书馆员等) 提供特定内容和服务". 2. A yellow box pointing to "WHAT WE OFFER" with the text "导航至我们的出版物组合". 3. A light blue box pointing to "WHAT WE SOLVE" with the text "Karger针对不同层次信息需求的解决方案". 4. A yellow box pointing to "PUBLISH WITH US" with the text "关于发表论文、征稿、合作出版、OA等信息". 5. A light blue box pointing to "RESOURCES FOR YOU" with the text "其他健康科学资源". At the bottom of the hero image are two buttons: "GET IN TOUCH" (orange) and "DISCOVER MORE" (white).

Abstract

Background: Anemia is a common complication of chronic kidney disease. The hypoxia-inducible factor prolyl hydroxylase inhibitor (HIF-PHI) is a new class of oral drugs for the treatment of renal anemia. *Summary:* Clinical trials have consistently shown that HIF-PHIs can effectively increase hemoglobin in both the dialysis population and the nondialysis population. The effects of HIF-PHIs in treating renal anemia include promoting endogenous erythropoietin production and facilitating iron mobilization. Several studies suggest that the erythropoiesis effect of roxadustat is less affected by inflammation. Careful monitoring of thromboembolic events and tumor before and during HIF-PHI treatment is necessary. *Key Messages:* HIF-PHIs are effective in correcting renal anemia. The long-term safety of HIF-PHIs needs to be further studied.

Keywords: Hypoxia-inducible factor, Chronic kidney disease, Anemia, Iron

Book Details
Cosmeceuticals are ingredients or products that provide cosmetic and therapeutic benefits and which can be obtained without a prescription. They are one of the fastest growing segments in the personal care product market. Even in the worst economic climate, sales of cosmetics remain robust. Beauty enhancers are our best means of feel-good escapism, and we are not about to give them up. The ingredients, sales locations, and the regulation of sales are dynamic aspects of the industry.
Here we give you a heads-up on where the market is going so you can make strategic decisions for your practice.
This book will give you an understanding of facial cosmeceuticals examining the needs of the face, moisturizer formulation, noninvasive testing, and clinical evaluation to establish efficacy. It sheds light on topics such as the delivery mechanisms of active ingredients, vitamin A and C and other antioxidants, growth factors and stem cells, peptides, or amino acids. Topics also include the use of cosmeceuticals for the treatment of acne, rosacea, and hair loss and for hair care as well as the treatment of scars and cosmeceuticals for sun protection and protection from pollution. It also covers aspects of nutraceuticals and diets for healthy skin.
